Recline the seat up to 20° in 2 positions without having to remove your child. The system has been developed so that the adult user has full control, being able to safely unlock, recline, and lock the seat again. The child will not be able to handle the system, thus preventing any possible accidents, ensuring the safety of both direct and indirect users.

### Comfort and safety

Cycling is increasingly being seen as a reliable, sustainable, economic and, therefore, logical mode of transport for the whole family. Our reclining system makes it even easier, increasing the comfort of your child as you ride.

PATENT PENDING

Not compatible with the following frames / bicycles

# CFS CARRIER MOUNTING SYSTEM

The bottom of the seat is securely attached to the carrier, which is extremely important as it increases stability for the rider. The child seat is easily fitted to the luggage carrier without the need for tools – just rotate the knob to easily fit or release the child seat. This also makes the seat really easy to store, and use while commuting. For increased child and cyclist comfort, seat can be moved backwards and forwards along the length of the luggage carrier.

## FOR SPEED E-BIKES

## E'CITY

THE SPEED PEDELEC HELMET

The current trend of E-bikes is increasingly implemented and a special bike needs a special helmet. S-EPACS have their own requirements so that users can safely adapt it to their use. One of them is the use of a helmet that complies with the requirements of NTA Standard 8776. Our E'City helmet was developed to meet the specificities of NTA 8776, and its shape was designed to match your daily outfit. Apparently, the speed E-Bike helmet looks like a normal bike helmet, but the main differences are the greater area of protection of the head and the absorption capacity of a larger impact. The E'city model combines a simple and casual design and contains enough air channels to ensure good ventilation. The visor will ensure adequate sun shade during commuting. With an easy-to-adjust retention system, adjustable straps and a side lock, the E'city includes a set of thermoformed inner pads that will help in the absorption of perspiration.

## BOTTLE CAGE PRO

THE PRO BOTTLE CAGE WITH EASY ACCESS, EVEN FROM THE SIDES

Polisport's Bottle Cage Pro is extremely lightweight, 33g. The clever geometry of the bottle cage allows you to quickly remove the bottle from a variety of different angles. This is a huge benefit, while you are riding, have no time to waste, and you need to focus on the road. The bottle cage is also suitable for small bikes and sloping frames that do not offer much space for a water-bottle. You can also match the Bottle Cage Pro with your bike color – say goodbye to those dark cages and pimp your bike!

## TOOL BOTTLE

THE BEST WAY TO TRANSPORT YOUR CYCLING ESSENTIALS

With the Polisport Tool Bottle, you can easily fit a spare tube, some tire levers, a multi-tool and some puncture patches in the 600ml hollow of the Polisport Tool Bottle, with a little bit of room to spare for any other tiny tool preferences you may have. There's definitely enough room in there for the ride essentials even if you need to store some other objects such as your keys or some coffee cash! This is a really good alternative to the saddle-bag because you will benefit from a wider opening with easier access than that of your normal saddle-bag and avoid some unstrapping as well. And of course, the certainty that it's also waterproof so you won't ever need to suddenly dry the contents of a saddle-bag after a five-hour wheel-spraying soaking. Our top benefit is that you can still use it to transport water in it since the material complies with food contact regulation.

## BALANCE BIKE

EXPLORING THE WORLD IN A HEALTHY AND HAPPY WAY

Polisport Balance Bike is a training bicycle that helps little kids learn how to steer and balance. It allows children to build the confidence they will need once they are ready for a more traditional bicycle with pedals - no training wheels required! Children are seated so that their little legs can reach the ground comfortably. A built-in steering limiter also allows children to maintain control of how much they turn. Comfortable hand rubber grips, an ergonomically designed seat and shock absorbing wheels give little riders extra comfort. Polisport Balance Bike features an adjustable seat that grows with the child.

- This item is considered a toy.
- Not to be used on public roads.
