## EU Type Examination Certificate

Date: 2019/05/17

n. **332192002/OE**

Validity:  
2024/05/16

Functions and performance levels:

The item is intended for the protection of the knee and shin specifically against lofted stones and debris such as those riders often encounter in off-road motorcycling and in allied sports activities where these hazards may exist. It is not suitable to reduce the severity of injuries caused by impacts in case of accidents.

Method: hemispherical impactor – impact force transmission at 10J measured through piezoelectric force transducer incorporated in anvil.

Registered values: ≤ 27kN

Note: The protective functions depend on the correct positioning of the protector, which falls within the responsibility of the user.

Marking:

Printed on a label and displaying the following information:

- **CE Marking;**
- Name/Brand of the Manufacturer + full address;
- designation of the product;
- pictogram "i in the booklet" inviting the user to read the User Manual;
- additional infos: negative symbols for washing & care, warnings on the intended use/limitations of use.

NOTE: the Technical File contains a more detailed description of the PPE (material, method of assembly, photographs or drawings), performance data, safety functions and level of protection, elements of conformity to the basic and supplementary requirements. The Technical File is integral part of the present Certification, which has to be kept available by the applicant to be forwarded - upon request - to the entitled person (supervising body, Controlling Officer).
